Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2,3,4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Asada (JP 10204155 A).

Regarding the claims, Asada discloses:

An epoxy resin (See abstract) sealing a chip including a filler containing 15 wt.% with respect to total filler and having particles of no more than 10 μ m in size; and a laser mark (YAG laser) on the package.

Regarding the limitations reciting the difference in color and its value, see that the device disclosed by the prior art meets the structural characteristics recited in the claims. It is inherent from this that it will display the same "colorimeter value" claimed.

Moreover, see that any surface could have a value of "at least 10" since that value depends on the colorimeter and, on the calibration of the colorimeter. See that a colorimeter could always be calibrated to produce a value of "at least 10"

Regarding claim 4, see that the prior art discloses the use of carbon black.

Response to Arguments

Applicant's arguments filed 10-03-02 have been fully considered but they are not persuasive. Applicant argues:

- The ranges of with regard to the filling do not overlap since the claims state that 85 to 90 % of the filler particles have an average size of "larger than 10 microns"
- The color difference claimed has a definite meaning to one skilled in the art, the colorimeter used is described in the disclosure

The above are not persuasive since:

- Although claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). The prior art specifically discloses particle diameter of 5 microns which is "at least 10" at a 15 % wt or above range, which is within the claimed "10 to 15 wt%"
- With respect to arguments about the colorimeter used and its description in the disclosure, see *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993)
- Calibration of the colorimeter is not described or claimed, see rejection above.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
